What SchoolBook is ?

Definition

SchoolBook is about bringing different faculties of different courses together so that students can find, link and share information with the faculty and others.

Problem Definition

We can have following connections:

- Faculty to Faculty
- Student to Student
- Student to Faculty
- Faculties can be categorized on the basis of courses and subjects taught.
- Faculties can advertise for their course structure, duration and fees.
- Students can connect to faculties even if they were not in any batch.
- Open group will be automatically created according to the batches of the students and faculties.

- Anyone can create a closed group and can send and receive requests for joining.
- We can have discussion pages for all courses.
- Students and faculties will have to subscribe for the discussion pages.
- These pages will be open to all like a forum.

Thank_You !!!

Questions are Welcome !!!
